### A WORD TO THE TRADE

We do not sell cheap groceries, but we do sell groceries cheap. In other words, while our prices are away down, our goods are away up in quality. That is the reason why our trade increases every month we are in business. We couldn't hold our trade on inferior goods, and we wouldn't sell them to you. All we ask is for you to come to our store, get our prices, look at the goods, and investigate thoroughly every order, comparing prices with any you can get. We ask your trade on this basis. Come and see us, and it will not be our fault if you are not entirely satisfied.

### PREVENT BOMBARDMENT

United States Marines Looking  
Out For Interests

OF THEIR COUNTRYMEN.

American Landing Parties at Ports of Honduras Carry Along With Them Hotchkiss Guns, Which Are Pointed Toward the Sea.

New Orleans, April 3.—Advices from Puerto Cortez, Honduras, under date of March 28, just received, say:

The intentions of the United States in landing marines on the Honduras coast and the evident latitude granted them in protecting foreign life and property are exciting much comment here. It has been remarked as especially significant that the American landing parties, not only here, but at Celiba and Trujillo, have in each instance placed a Hotchkiss gun, which they took ashore with them, so as to sweep the seaward approach. Foreigners believe this means the United States will not permit the ports to be bombarded. Inasmuch as 90 per cent of the houses here and at Celiba belong to foreigners, cannon shot fired into either place would do the most damage to foreign owned property. It is believed that in the case of these two ports Nicaraguan gunboats will be kept off by Hotchkiss guns, while at Trujillo, despite the fact that it is a Honduran port, a Honduran gunboat will not be allowed to bombard in any attempt to recapture the port from the Nicaraguans. Both countries are treated impartially in this respect.

Although the powers granted Commander Fullam of the American gunboat Marietta, which landed these parties, are believed to be sufficiently broad to prevent naval attacks, yet foreigners fear the Americans will not interfere to stop landing parties from charging local garrisons and capturing the ports.

The rear, however, that such captures would involve the horrors of looting has been dispelled, at least for the coast towns, where Americans are stationed, by the experience of Trujillo. There the Nicaraguan captors conducted themselves in a most exemplary manner.

Reports of conditions at the captured interior towns are not so satisfactory. At Trujillo Commander Fullam is reported to have summarily settled the difficulty arising over the burning of some houses and also one between United States Consul Agent John T. Glynn and the Nicaraguans. Details about either of these affairs are not available here.

At Puerto Cortez a dozen marines, comprising a landing party, quartered, perhaps, in the United States the most widely known Honduran buildings, namely, the Mansion House, formerly occupied by the Honduran National Lottery company. The marines occupy the large room where the lottery drawings were held, and a Hotchkiss gun stands on the veranda. This handful of marines are in the midst of about 1,500 Honduran soldiers, who are continually drilling and throwing up fortifications.

**Charter Adopted.**  
Fort Worth, April 3.—The city charter was adopted by about 4 to 1. The vote was adopted by about 3 to 1. The vote was 2,178 for and 405 against.

**Hill Has Resigned.**

St. Paul, April 3.—James J. Hill has resigned as president of the Great Northern, and will be chairman of the board of directors. E. W. Hill, his son is now president.

**Still at Amapalpa.**

San Salvador, April 3.—President Bonilla of Honduras is still at Amapalpa.

### STATEMENT OF PARKER.

Displays the Keenest Interest in  
Letter of Harriman.

BUT DROP IN THE BUCKET

Former Presidential Candidate Declares Reported Amount Railroad Magnate Is Nothing Compared to the Sums Secured From Other Sources.

Albany, April 3.—Hon. Alton B. Parker was in the city Tuesday and displayed the keenest interest in the letter of E. H. Harriman, especially in regard to its relation to his own charge made in the 1904 campaign, that the great corporation interests were largely financing the Republican party. He issued the following statement:

"That \$150,000 was turned over by the Equitable, Mutual and New York Life insurance companies to Mr. Cortelyou's committee has never been denied, of course. It was testified to under oath before a body who could have summoned Mr. Bliss and Mr. Cortelyou to the witness stand if it had been desired. It is safe to deny Mr. Harriman's statement because there is not a committee before whom Mr. Bliss and Mr. Cortelyou and other can be summoned and compelled to testify. Congress has refused to make an investigation of the corporate contributions of 1904, or to pass a law prohibiting corporate contributions in the future. The money raised by Mr. Harriman and contributed by the life insurance companies, aggregating \$350,000, was but a drop in the bucket as compared with the total contributions of railroads and other great corporations. The public importance of an investigation at this time, therefore, cannot be overestimated.

"One of the questions now pressing for solution is whether Federal governmental control over railroads and other great corporations shall be further extended. It will help to solve that problem rightly, to learn that governmental power in the past has been used for political purposes; used to raise money to continue in existing administration. The proof that it has been used will make it perfectly clear to every mind that it can be used again; aye, that it will be used again, and, indeed, will continue to be used so long as politics and business can be made mutually helpful to each other.

"An investigation should be had that will bring out the whole truth. It will help many to see quite clearly what is now hidden, viz, the ultimate purpose of some of those who seek in the name of reform to strip the states of power that it may be centered at Washington."

### DISEASED MIND.

Mrs. Annie M. Bradley Pleads She Was Mentally Irresponsible.

Washington, April 3.—Mrs. Annie M. Bradley, who shot to death former United States Senator Brown of Utah in a hotel of this city Dec. 8 last, pleaded mental irresponsibility as her defense to the indictment for murder. This fact came out when her counsel asked the supreme court of the District of Columbia for an order authorizing the summoning of thirteen witnesses from the west to testify here at government expense to testify in her behalf. Accompanying this motion is an affidavit in which Mrs. Bradley says she is unable to pay the expenses of the witnesses. It is declared that the defense expects to prove by these witnesses that any act she committed that day was the result of the diseased condition of her mind, for which she is not responsible.

DALY-ELBERT.

Bryan Young Man Claims a Bride in the Oleander City—Were Married Yesterday.

Sacred Heart church of Galveston was the scene of a pretty wedding yesterday morning at six o'clock, when Mr. John D. Daly Jr. of this city and Miss Theresa Elbert of Galveston were united in marriage according to the solemn and beautiful marriage rite of the Catholic church by Rev. Father D. J. Murphy. Some two hundred invitations had been issued and there were many friends gathered to witness the marriage celebration. Mr. Frank Michalke of Galveston was best man and Miss Mamie Heer maid of honor, both being residents of Galveston.

The bride wore a lovely blue suit trimmed with real lace, hat, gloves and shoes to match, and carried bride roses. The maid of honor, Miss Heer, wore cream silk with

hat and gloves to match, and carried carnations and ferns.

The bride is a niece of Mr. and Mrs. Ben H. Elbert of Galveston, and reared in that city. A young lady of charming personality and lovable character, she has a large circle of friends in her home city whose best wishes follow her to Bryan, where friends she has made on previous visit to this city will give her cordial welcome.

The groom is a son of Mr. J. D. Daly and was born and reared in Bryan, where many have cherished his friendship from childhood. He is energetic and capable in business matters and is associated with his father in business.

The young couple left Galveston shortly after the wedding and are now at home with the groom's father on the east side of the city.

#### GATHERING FORCE.

Dr. Risner is Adding to the Interest of the Revival Services at the Baptist Church — Strong Gospel Preaching.

Strong sermons by Dr. Risner yesterday, morning and evening, gave additional momentum to the revival services at the First Baptist church. The subject yesterday morning was "Christ Living in Us," based on Galatians ii, 20: "I am crucified with Christ; nevertheless I live; yet not I, but Christ liveth in me; and the life which I now live in the flesh I live by the faith of the Son of God, who loved me and gave himself for me."

At the evening service the subject was "The Arch Deceiver," predicated on the first clause of the tenth verse of the twentieth chapter of Revelations: "And the devil that deceiveth them." Both sermons were presented in a way to warn the sinner of the consequences of sin, and point him to salvation, and to urge christian people to diligently work for the salvation of souls. Members of the congregation renewed the pledge last night for a vigorous effort in behalf of the meeting.

Services regularly at 10:30 a. m. and 8:00 p. m. daily.

#### SWEEPING GAINS.

Republicans Were Victorious in a Number of Places.

Guthrie, April 3.—Returns from Oklahoma and Indian Territory indicate sweeping gains for the Republicans. In Guthrie the entire Republican ticket was elected by small majorities, ex-Governor C. M. Barnes being the mayoralty candidate. The Democrats of Oklahoma claim the election of practically the entire ticket.

The Republican tickets were successful at Enid, Shawnee, Kingfisher, Tulsa, I. T., and Okmulgee, I. T., while Lawton, Hobart and Norman returned reduced Democratic majorities. In many towns sentiments against the constitution were merged with local issues.

#### IDOL OF ARMY.

Wife of President Zelaya Popular With the Nicaraguan Soldiers.

Washington April 3.—Senora Zelaya, wife of President Zelaya of Nicaragua, has made herself the idol of the Nicaraguan army by her active service at the head of the Red Cross in the recent battles between Honduras and Nicaragua, according to James Deitrick, a mining engineer with interests in Honduras and Nicaragua, who called at the state department to discuss the Central American trouble.

"Senora Zelaya rode more than 150 miles on muleback to reach the scene of military operations," said Mr. Deitrick, "and she personally assisted in the care of the sick and wounded, both of the Honduran and Nicaraguan armies. The people of the republic have always been devoted to her."

#### GREENBUG DEVASTATION.

Damage Done in Oklahoma by the Pest is Considerable.

Oklahoma City, April 3.—C. V. Popping, secretary of the Oklahoma Millers' association, who has received reports from every section of Oklahoma, in a report made public, estimates that 15 per cent of the wheat and 25 per cent of the oats crop is destroyed by the green bug. There is, he says, not a section where the pest has not appeared, while in some sections both crops are totally destroyed. The bug is now beginning to fly, and it is believed the next ten days will see the end of its ravages.

#### Japanese Warships Coming.

Aden, Arabia, April 3.—A dispatch received from the Island of Perim (at the entrance to the Red sea) announced that two Japanese warships bound for Hampton Roads passed there Sunday morning. The two Japanese ships referred to are the cruisers Chitose and Tsukuba, under command of Vice Admiral Ijima.

## Swell Clothes for Gentlemen

Style is as thoroughly characteristic of our Clothes as is their splendid quality and perfect fit. There's an unusual something about them---a distinctive look---that speaks clearly of good taste and master-tailoring.

# THE ELECTRICAL WORLD

POWER FROM THE CLOUDS.

Static Motor That Runs by Lightning.

Under this title a static motor is illustrated and described by C. Francis Adams in the Scientific American. It is the fact that atmospheric electricity is of the static type, and that if we are ever to utilize the sphere as a source of electric energy we must employ some such means as this, the ordinary style of or being quite unfitted for the purpose. The ordinary motor is a reversed dynamo, and in like manner a motor is a reversed glass-disk electromachine. It may be regarded, Mr. Adams says, as an extension of the Millar experiment in which a pith ball oscillates between two oppositely charged bodies, such as a glass rod and a stick of sealing-wax. He says: "In its simplest form [it] consists of a glass or mica disk supported on metal points and well balanced. This disk has five armature sections of tin overlapping the edges of the disk at equidistant points. Enveloping disk also at equidistant points are metal field-poles, each field-pole electrically connected with the field-

Motor to Utilize Electricity of Clouds.

The diametrically opposite. Each pole is a thin brush mounted thereon, which contacts with the armature sections as they pass thereunder. As there are five armature sections and four field-poles, some one of these brushes is always in contact with an armature section. If, now, one pair of opposite field-poles be positively charged and the other pair be negatively charged, some one of the armature sections receives a charge of like sign with the field-pole enveloping it. The armature section is, therefore, immediately repelled, and moves away from the field-pole and toward the next field-pole, to which it is attracted for the same reason. As it passes under the brush of the latter field-pole the charge is given up for one of unlike sign, and the armature section is immediately repelled by this field-pole. Similar phenomena are taking place at each of the other field-poles, and continuous rotation at high velocity is maintained."

A series of armature plates forming a battery are mounted on a single shaft, and all the like armature sections in a row (parallel to the shaft) are connected, thus securing a larger capacity in each of the five armature sections. The field-poles are likewise connected together, and the brushes are arranged to contact with the armature sections only just after each has passed the median line of each field-pole. Therefore the motor always turns in the same direction. Says the author:

"Any suitable source of high-tension current sufficed for power, as, for example, an induction machine. A charged glass rod held to one and a charged sealing-wax rod held to the other of the field-posts were sufficient to cause considerable rotation of a single-disk motor.

"In experiments in wireless telephony a pole supporting wires 15 feet above the roof of a two-story frame house was used. It was noticed that in the occasion of storms there would be sparking at the gap in a plug cut block on the instrument table. It was found that on connecting the motor between the points, that is, so that one field-pole was in metallic communication with the earth and the other with the aerial, the motor would begin, beginning some little time before the rain began to fall. It was also noticed that the motor did not always behave similarly; sometimes it would revolve rapidly, while upon the occasion of other storms the torque would be weak.

"As the force of attraction and repulsion is in proportion to the capacities of the opposed surfaces, it would seem that a motor of considerable power might be constructed to run by static current taken from the passing clouds, and this is suggested as a line of research of not unpromising results."

## Cars of Metal.

A company which manufactures parlor-cars and sleeping-cars is to erect a plant for the building of cars constructed entirely of metal. The new cars will be stronger than those of the old type, and in railroad accidents will not take fire. The question arises whether those who cannot afford seats in parlor-cars, but must ride in common coaches, are not entitled to equally safe vehicles. In the good time coming every car and the entire railroad equipment will be as good as human skill can make it.

## AMBIDEXTERITY.

Society Formed in London to Encourage Use of Both Hands.

A standing puzzle is the almost universal tendency of men and women of all races to use the right hand in preference to the left. Examination of skeletons has shown, by the differences of bone development, that this tendency is of very ancient origin. It is often ascribed to the fact that the left hemisphere of the brain—which controls the right side of the body—possesses, in normal persons,

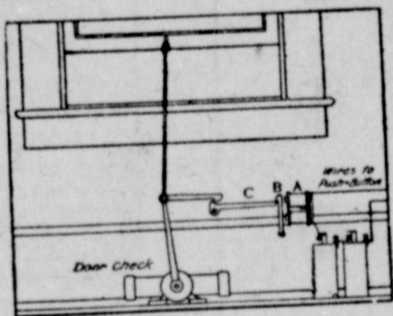

a superior development. But those who think that the preference for the right hand is an acquired habit, although one of immensely long standing, suggest that perhaps the left cerebral hemisphere has become better developed as the result of the over-use of the right limbs. At any rate, says Youth's Companion, a society has been founded in London for the cultivation of ambidexterity, and it will be for the physiologists of the future to determine whether education in the use of the left hand can affect the development of the right side of the brain.

## ELECTRIC WINDOW CLOSER.

Contrivance by Which Chamber Was Ventilated Without Rising from Bed.

The sketch herewith shows a device that I have used for the past two years for closing my bedroom window at night without getting up, says a correspondent of Popular Mechanics. An ordinary door check is connected to the window by a small chain and is operated by an electric releasing device as shown. When the circuit is closed the magnet, A, attracts the armature, B, and releases the trigger, C, thus allowing the door check to close the window. The push button for closing the window is connected to the circuit.

Closing Window by Electricity.

ing the circuit may be located in a convenient position for operating from the bed.

## Electric Car Brakes.

Considerable interest has been awakened in the trial of a new electric brake on a New York street car. The power is furnished by the trolley current. The motorman applies the brake with a handle, similar to that of the ordinary air-brake, and releases it by pressing a foot-pedal, says Youth's Companion. It is said that with the electric brake the labor of the motorman is greatly reduced, while the stops are effected more smoothly and easily. There is no surging of the car, the reason offered being that the electric brake can be released instantly, whereas the air brake must escape from the cylinder of the air brake before the pressure on the wheels can be relieved. To provide against failure of the trolley current, a device is furnished whereby the motor can be short-circuited, and the car thus quickly stopped.

## Electric Signs.

Brilliant effects for electric signs are now to be readily obtained with little cost by the use of small colored transparent caps which fit over the rounded ends of the incandescent bulbs. This permits the owner of a changeable electric sign to alter the legend at will and to indulge in the use of colors without the necessity of keeping on hand a large supply of colored lamps, some of which are very expensive.

## New Telegraph Line.

There is now on foot in France a project for uniting the French Sudan to Algeria by means of telegraph lines. Britain has projected a cape-to-cape wire which touches and crosses the Belgian Congo and German East Africa. The French line will doubtless have the advantage of traversing only French soil.

## A New Alloy.

A new alloy, which serves electrical as a substitute for platinum, consists of 16½ ounces of silver, 4½ pounds of nickel, ½ ounce of bismuth and 53 pennyweights of gold. The cost is about one-thirtieth of that of platinum.

## A Mechanical Man.

A mechanical man that can do a great many things a human being can do is the invention of a German. The machine has 305 compartments and several electric motors.

# His Beard Didn't Suit

AN ECCENTRIC BACHELOR HAS SCULPTURED HAIR REMODELED.

Phineas Wright, of Derby, Conn., Has "Part" in Whiskers on Stone Monument Cut Out So He Can Get Into Heaven.

Derby, Conn.—Because he dreamed that he could not enter heaven with his beard parted in the middle on the bust on his \$1,500 monument, Phineas Gardner Wright, said to be the wealthiest man in Putnam, has had a sculptor bunch the stone whiskers at an expense of \$400.

Wright, who is a bachelor, 78 years old, erected the monument on his family lot in Grove cemetery, three years ago. It attracted much attention because of the line he had inscribed upon the granite shaft, just below his bust: "Going, but know not where."

At the same time he had an immense grave dug and bricked up, so that the earth would not crowd him, he said, and he would have enough room in which to turn over and move about, and with flat stones at the base so that he should not sink.

"Them's true words," said Wright, referring to the odd inscription, "but there ain't many folks what's got the honesty or the courage to say the same thing."

A short time ago Wright had a gas pipe placed in the ground above his grave, so that there would be no difficulty in finding the flat stone cover, but last week he concluded that people would think he was trying to get air after he had been buried, so he is having a five-foot steel flagstaff with a banner bearing his name made to take its place. He has placed demijohns of gin and whisky in the grave, so that he will not be thirsty.

Wright's mother and sister are buried in the plot, and their names, birth and death dates, with those of his father, who died at Stockton, Cal., in 1849, while gold-hunting, are inscribed on the monument. Wright was born at Fitzwilliam, N. H., April 3, 1829, and two years later his parents came

to Connecticut. They were poor, and young Wright had to work hard. He says he broke the first earth for the Air Line railroad.

Then he carried the hod for 75 cents a day. After many years he got ahead by buying lumber. He retired ten years ago, after he had amassed a fortune of \$125,000, invested mostly in real estate and mortgages.

Wright says he was disappointed in love 40 years ago and he has written reams of poetry on the perfidy of women. He has provided that after his death this additional inscription shall

Didn't Like the Part in His Beard.

be placed upon his monument: "Never beat by man, but by woman."

Wright lives in a plain house with a niece, Mrs. Etta Crane, 20 years old, daughter of William Crane, a Hartford manufacturer. She does the housework, shaves him, cuts his hair and washes his face and hands. She owns a \$4,500 farm at Ellington and Wright has made a will leaving his all to her, except \$2,000 to the Putnam Congregational church, because his mother attended it, and \$2,000 to the Putnam hospital.

An old monument costing \$600 which the present one displaced, he has offered to the city for a soldiers' monument, but it has not been accepted.

Wright's occupation is given in the Putnam City directory as "having no business, but to mind his own."

# IS PROMOTED FOR SACRIFICE.

Congress Raises Army Doctor Made Invalid by Yellow Fever Tests.

Washington.—Dr. James Carroll, contract surgeon in the United States army, has been raised from lieutenant to major by a special act of congress in recognition of his sacrifice in sub-

DR. JAMES CARROLL. (Army Surgeon Promoted for His Self-Sacrifice.)

mitting himself to inoculation from yellow fever mosquitoes at Havana, which gained the government important knowledge of yellow fever, but made him an invalid.

Dr. Carroll was born in England in

1854 and is a naturalized citizen of the United States. He has served continuously in the army since January, 1874, on the plains and elsewhere, as a private soldier, noncommissioned officer, and, during the last nine years, as contract surgeon.

In the summer of 1900, after demonstrating that the so-called bacillus lateroides of Prof. Sanarelli was simply the common American hog cholera bacillus, he was detailed as a member of the army medical department yellow fever board, which has proved that yellow fever is a disease conveyed by a particular variety of mosquito. Dr. Carroll and another member of the board, the late Dr. Jesse M. Lazear, voluntarily subjected themselves to the bites of purposely contaminated mosquitoes, in order to justify the application of them to other individuals.

Dr. Carroll was the first to suffer an attack. He was bitten once on August 27, 1900, by a mosquito that had been applied to three yellow fever patients in one of the Havana hospitals. Five days later he was carried on a stretcher to the isolation camp as a yellow fever subject. His attack was a severe one. During Dr. Carroll's illness the same insect was applied by Dr. Lazear to another individual, who suffered a mild attack, from which he promptly recovered. Dr. Lazear came next. After being bitten by a stray insect in one of the city hospitals at Havana he was taken sick September 18, 1900, and died one week later. Dr. Lazear left a wife and two young children. Dr. Carroll has a wife and five children.

## ON THE SITE OF OLD BAILEY.

Famous London Prison Is Displaced by a New Building.

London.—The new central criminal court, erected on the site of the historic old Newgate prison, commonly known as the Old Bailey, was opened the other day by King Edward, who

Front View of "Old Bailey."

was accompanied by Queen Alexandra. The function was a semi-state affair and considerable ceremonial was observed. The streets traversed by the royal procession were decorated with bunting and lined by large crowds. The lord mayor and the sheriffs, in their robes of state, met

the king and queen at Temple Bar, where the lord mayor presented the king with the city sword, symbolical of handing over the defense of the city to the king while he remained within the boundaries. In a pavilion in front of the portico of the new sessions house an address was presented to the king, who replied and declared the building open.

The king and queen subsequently inspected the interior of the courthouse, the corner stone of which was laid in 1902. It is an imposing structure with a frontage on the thoroughfare known as the Old Bailey of 287 feet and 142 feet on Newgate street. The dome is 195 feet high, and the whole building cost \$1,500,000. This street corner, in the center of the city, has been the site of prisons since the year 1188, and for more than a century Newgate was the scene of all the public executions of the death sentence until the private executing act of 1868 ended the gruesome spectacles.

## The Gull and the Fish.

A huge flounder was recently netted off Atlantic City that had the skeleton of a gull fastened to its back.

Plainly the gull had attacked a fish too big for it and had sunk its talons so deep that it could not withdraw them.

It had drowned and by degrees it had become a skeleton. The flounder, unable to free itself, had perhaps carried its ghastly burden for years.

Eight dollars has been refused for this remarkable catch.

# IS LEARNING FARMING

JOSEPH MEDILL PATTERSON STUDYING AGRICULTURE.

Young Millionaire Socialist of Chicago a Student at Wisconsin University—Plans to Run a Model Dairy.

Madison, Wis.—There came to the Wisconsin state university last fall a young man who told the professors that he wanted to learn how to milk a cow and plow and sow and mix bran-mash for hogs—he wanted to learn to be a farmer.

This was nothing extraordinary, because there are several hundreds of farmers' sons there now taking the course in agriculture. Very many of them are earning their own way. But when the newcomer gave his name even the staid professors who teach the rotation of crops and the methods of preparing ensilage were surprised.

The new student didn't need to learn how to work. He is a millionaire and has an income now of \$50,000 a year, with more to come. His name is Joseph Medill Patterson, Yale graduate, who intends to live what he calls "the honest life," despite his fortune and his expectations. He means to do his share of the everyday labors of men less fortunate than he.

His golf clubs are left to grow rusty in their bag. His automobile has been disposed of. Society is a closed book now. What he purposes to do is to establish a model dairy on a large farm near Chicago. He expects to supply high-class dairy products to the sick and ailing.

To begin with, he is living the simple life. He took his family to Madison, and they have taken an eight-room cottage near the university. Any carpenter or dairyman could well afford to live in it. Four or five times a day the young man walks over from his modest home to his dairy work at the university.

The household consists of Mr. and Mrs. Patterson, their two baby girls and two maids. What little leisure the young man enjoys is spent at home, playing with his babies or reading.

Occasionally he finds time to write for the socialist press. For these articles he refuses pay, but when he writes for the every-day magazines he demands the regular recompense that would go to any writer.

Just now Mr. Patterson is working so hard over the problems of scientific dairying and up-to-date agriculture that he hasn't had any time to write about his socialistic ideas. The course he is taking is arranged for two years, each term lasting four months. The other eight months of the year are spent in practical work on the farm. Mr. Patterson thinks he can get all he needs in one year.

Dean W. A. Henry has arranged a special course for him, and it requires 36 hours a week. The usual course takes only about half as many hours. The studies include the value of different feeds for livestock, dairying, livestock judging, plant life, soils, selection of seeds, agricultural engineering, veterinary science, farm mechanics and similar subjects.

The young millionaire pays a tuition fee of \$42.75, of which \$35 is because he is not a resident of Wisconsin, seven dollars for general incidental purposes and 75 cents for the privileges of the general gymnasium. He is regarded by the faculty as an exceptionally good student and by his fellow students as an agreeable associate.

Few of the latter, however, really know who he is because of the short time he has been at the university.

JOSEPH M. PATTERSON. (Millionaire Socialist Who is Studying to Be a Farmer.)

and because of his rather retiring disposition. He mingles freely with the 3,000 students in the institution, meeting many of them on the campus, in classroom, at the gymnasium and libraries.

Mr. Patterson has bought a farm of 220 acres at Libertyville, Ill., 35 miles northwest of Chicago, and will make his future home there. He is building a new house and a number of stock barns on it, and intends to stock it with thoroughbreds and make it a model farm in all respects.

Mr. Patterson's father is Robert W. Patterson, editor of the Chicago Tribune, a graduate of Williams, and a son of the late Rev. R. W. Patterson. His mother is a daughter of the late Joseph Medill, one of the founders of the Chicago Tribune. Young Patterson was editor-in-chief of the Tribune during the absence of his father in Europe in the fall of 1904.

# Thunder Castle to be Razed.

Once Sheltered the "Three Graces," America's Most Beautiful Women.

Baltimore, Md.—Thunder castle, the home of the Catons, the notable old buildings from which Catonsville derives its name, has been purchased by

Thunder Castle at Catonsville, Md.

former Senator John Hubner and will be torn down to make way, it is said, for a more modern cottage.

The building is in the western part of Catonsville. It was the property of a relative of Gen. Winfield Scott, and many persons have believed it belonged to Gen. Scott. The old general used to spend considerable time at Castle Thunder.

The old house, tradition says, was at one time the leading hostelry of Catonsville. There the stages used to leave many a weary traveler westward, who desired a night of rest before continuing on.

The property originally belonged to Charles Carroll of Carrollton, first signer of the Declaration of Independence, and came into the possession of Richard Caton through the marriage of Mr. Carroll's 16-year-old daughter, Mary Carroll. Beneath the roofs of Thunder castle have been sheltered three of the most beautiful women of America. They were the three eldest of Richard Caton's four daughters, who married abroad and were known as "The American Graces."

Before the civil war a private school was conducted at Thunder castle by Mrs. Carrie Coale and her daughter. Since the war it has been occupied as a private dwelling.

The building is constructed of stone. Several years ago a large frame wing was added to the structure.

The old house is located on what was known in early days of the village as the national pike between Washington and St. Louis. It was the government mail route through Maryland, the western part of what was then the state of Virginia and the states of Ohio, Indiana and Illinois, and was the first great internal improvement

that the government of the United States undertook.

## HEADS NEW RUSSIAN DOUMA.

Feodor Golovin, a Constitutional Democrat, Elected Speaker.

St. Petersburg.—Feodor Golovin, who was elected speaker of Russia's new duma, or lower house of parliament, when that body met and organized in the Tauride palace, St. Petersburg, recently, is a man of great energy, and throughout the long-continued reign of turbulence has managed to hold the confidence of the people. He is a constitutional democrat and, although this faction has only 100 members, Golovin received 331 votes, against 91 for the conservative candidate, the socialists throwing their strength for Golovin. The new speaker represents the Moscow province.

FEODOR GOLOVIN. (He Has Been Elected President of the New Russian Douma.)

He is 40 years old, aristocratic and clever. During the regime of Grand Duke Sergius he was president of the Moscow zemstvo and is said to be well qualified to preside over what threatens to be a stormy session of the duma.

## A Remedy.

"See here, Bridget," said Miss Housekeeper, "the dishes you have put on the table of late have been positively dirty. Something's got to be done about it."

"Thrus for ye, ma'am," replied Bridget, "if ye only had dark-colored ones, ma'am, they wouldn't show the dirt at all."

# THE MORNING EAGLE

Entered at the Postoffice in Bryan, Texas as second-class matter.

BY CARNES & WALLACE

BRYAN, TEXAS, APRIL 4, 1907

## IMMEDIATE REPAIRS NECESSARY

On Long Bridge or Trestle of the Bryan and Iola Road—\$3000 or \$4000 Should be Expended to Put Bridge in First Class Shape.

Mr. A. W. Buchanan of this city, and Mr. J. D. Jones of Harvey visited the long bridge or trestle across the Navasota river on the Bryan and Iola road a few days ago, and Mr. Buchanan informed the Eagle representative yesterday that the bridge is in quite bad condition, and growing continually worse. The floor is swagging and has a number of holes in it and some of the cap sills are broken. The condition of the bridge demands immediate attention because it is one of the most important avenues of trade which leads to this city from surrounding counties.

Mr. Buchanan says the impression is going abroad that Bryan is going to abandon the trestle and let it go down, and work on it should be begun at once to counteract this impression. Mr. Buchanan thinks three or four thousand dollars will put the bridge in first class shape, and the Eagle thinks it would be wise for the business men to co-operate with the county authorities in making necessary repairs of a permanent character. Bryan enjoys a large trade from the territory across the river, which there is every reason to believe she can hold indefinitely on account of the superior inducements offered by the Bryan merchants, if the roads and the long bridge are kept in proper shape. This important matter should receive immediate attention as numbers of people are coming here daily from that territory all the year around and every day the matter is delayed will increase the final expense.

## THE GLEE CLUB CONCERTS.

The Glee Club has definitely decided upon April 20th as the date for the concert in the college chapel this year. On Friday night the 19th they will give a concert in the opera house at Bryan. Miss Hetie Smith of Bryan has kindly consented to assist, and the Mandolin and Guitar Club will give at least one number. The program will be an attractive one—the result of a year's hard work. On April 28th the Glee Club goes to Ft. Worth to attend the festival of the Texas Federation of English Singing Societies, of which it is a member.—The Battalion.

A private letter from Mr. C. E. Burgoon has been received, addressed from 360 Pearl Street, Brooklyn, New York, where he is now engaged with the Brooklyn Edison Company. This company is putting in a large power plant at that place. It will be remembered that Mr. Burgoon took his Master's degree in Mechanical Engineering from Cornell a year ago, and his many friends at College will be glad to know of his continued success.—The Battalion.

## SHOOTING ON STREET CAUSES A COMMOTION.

D. B. Knox Fired Twice at M. G. Nall Who Escaped Injury—Knox Gave Bond in Sum of \$750.00.

Shortly before noon yesterday two pistol shots rang out from the corner on which J. L. Hearne's saloon is located and caused considerable excitement on the streets for a time. Investigation disclosed the information that the shots were fired by D. B. Knox at M. G. Nall, who escaped injury. One of the bullets struck a small shade tree in front of the saloon and the other struck the plastering on the facing of the saloon's door. There appear to have been some eye witnesses to a part of the shooting, one of whom was Sheriff R. M. Nall, who it is alleged, knocked or pushed the pistol down at the last shot and placed Mr. Knox under arrest. Knox waived examination yesterday afternoon on a charge of assault with intent to murder, gave bond in the sum of \$750 and was released from custody.

## LIVERY BUSINESS CHANGE.

Messrs. W. G. Reynolds and H. O. Ferguson on yesterday purchased and took charge of the livery, feed and sale stable business of J. W. Hunnicutt. They will continue the business at the same stand under the name of Reynolds & Ferguson. Both gentlemen are well known to the people of Bryan and Brazos county, and both are experienced in handling stock and are good business men. They intend to keep the business up to the high standard of excellence maintained by their predecessor, and to make improvements from time to time as opportunity is afforded. They ask a liberal share of the patronage of the public, and this the Eagle feels sure they will receive. Mr. Hunnicutt states that he has not formed definite plans for the future. We join his many friends in hoping that he will not see fit to locate elsewhere.

## A. AND M. BASEBALL SCHEDULE.

Friday, April 5—U. of T.  
Saturday " 6—U. of T.  
Monday, " 8—Houston League  
Tuesday, " 9— " "

## THE MARKETS.

Kansas City Stock Yards, April 1st, 1907.—Quarantine receipts last week aggregated 173 cars for the week, against 120 cars previous week and 88 cars same week last year. The market was lower Monday, but advanced after Tuesday, closing up with a net gain of 10 cents for the week. Run is 65 car loads today, market 10 higher and active. The supply of cattle in the native division and at other markets is small today, and has been light for nearly a week now, giving the situation a good healthy tone. Some very good steers are included in the quarantine run today, top for the season being paid for some of the Johnson steers, from Chickasha, at \$5.65, with one load of the same steers, lighter weight at \$5.50. The average quality was good today, bulk of sales \$4.60 to \$5.00, a few steers at \$4.20 to \$4.50. Some choice heifers sold at \$4.50 in the quarantine today, cows at \$3.40 to \$3.85, bulls \$3.35 to \$3.75, and the general line of sales today is highest paid this year. The tendency of the demand lately has been for medium and lighter weight steers, making quarantine offerings very desirable on account of their handy weights. Native steers of all weights sold strong to 10 higher today, one lot at \$6.40, highest price paid here for six weeks, other sales around \$6.00 bulk \$4.80 to \$5.50.

Hogs took a turn upward early last week and have been going up steadily each day, including today. Smaller supplies, and strength in provision was the cause. Run is 5500 today, market 5 higher, top \$6.55, bulk of sales \$6.45 to \$6.52 1-2. Not many heavy hogs have been coming lately, and there was a decided change for the worse in the average quality last week. While heavy hogs are pretty well marketed, some owners are holding back because of the sacrifice demanded, light and inferior hogs selling 2 1-2 to 5 cents above choice heavies in most cases.

J. A. Rickart,  
L. S. Correspondent.

## MANY ENJOYED FANCY SKATING.

Birmingham, Ala., March 25.—"Remarkable skating" was the expression of the many patrons who attended the session at the skating rink last night. Promptly at 9 o'clock the arena was cleared and Miss Louise White, with Mr. Louis Wastell, entered and began their exhibition of fancy and trick skating. They presented a beautiful and graceful sight. Mr. Wastell was in evening dress and Miss White in a beautiful costume, and with her natural beauty of face and figure was most pleasing to look upon. Their work together included some of the most wonderful and difficult skating ever executed in this city. Skaters especially enjoyed the performance, because they knew how difficult it was. The couple were given hearty applause on almost every trick or way of skating. Their waltzing, two-stepping and double two-stepping were the most graceful ever seen here. The couple apparently justly deserve the title of "the world's best skaters." Mr. Wastell announced that the performance will be changed every day, the couple doing new stunts each day. On Tuesday and Wednesday nights they will appear in comedy. Their performance will take place daily at 4 and 9 p. m. all the week.—Birmingham Paper.

The management of the Bryan rink have secured Miss White and Mr. Wastell to give three performances here in Bryan on April 8, 9 and 10. Performance at 9:30 each evening. Admission 15 cents. 100

The A. & M. College has just received a very handsome booklet with twenty-five views of the A. & M. College, accompanied by some descriptive matter and a list of the graduates of the institution. The views bring out the many really ideal scenes that abound about the campus, and will be an eye opener for people in and out of the state who are not familiar with the appearance of the institution and its ample and well kept grounds.

Morris Furniture Company, wholesale and retail dealers in New and Second Hand Furniture. Furniture repairing and upholstering promptly done. Satisfaction guaranteed. Next door south of Exchange Hotel. W. L. Houston, Jr., Manager. 97tf

At a meeting of the Mutual Improvement Club held yesterday afternoon the following officers were elected for the ensuing year: Mrs. A. J. Buchanan, president; Mrs. M. Francis, vice-president; Mrs. Ed S. Derden, recording secretary; Mrs. Walter Wipprecht, treasurer; Mrs. Paul M. Rayson, reporter and parliamentarian; Mrs. M. W. Sims, critic.

Mr. F. M. Beaty of the Southwestern Amusement Company was in the city yesterday arranging with Manager Mike of the opera house to put on here throughout the summer months a moving picture show. Mr. Beaty says he has a high class attraction and will put on new pictures every two days. The company will play engagements in a number of Texas towns at the same time, and by purchasing the pictures through a Chicago agent and exchanging them among the towns where they will play for the summer, will be able to favor their patrons with a very low admission rate. Mr. Beaty says his attraction is strictly high class.

## THAW NOT CAPABLE.

Dr. Diefendorf of Opinion He Cannot Rightly Understand.

New York, April 3.—When the Thaw lunacy commission went into session Wednesday District Attorney Jerome called to the witness stand Dr. Allen Ross Diefendorf, superintendent of the state hospital for the insane at Middletown, Conn., and professor of mental and nervous diseases at Yale university. Dr. Diefendorf testified for the state at the trial of Thaw, declaring defendant knew the nature and quality of his act when he shot and killed Stanford White and knew the act to be wrong. To the commission the alienist declared that from what he had seen of Thaw and the writings he had examined he is of the opinion that Thaw is not now capable of rightly understanding his own position, appreciating the nature of the charge against him or rationally advising his counsel.

## SEARCHING FOR LIQUOR.

Several Hundred Gallons Found on Trains and Poured Out.

Denison, April 3.—United States Marshals Sam Cone and W. E. Johnson have been specially deputized to go through all railway trains in Indian Territory in search of liquor. Since April 1 they have spilled several hundred gallons. At Brockchito, Blue, Bennington and other points they have burned the paraphernalia of gambling houses.

Representing the best of companies in all lines of insurance, I invite a liberal share of your business in 1907. Careful and prompt attention to all business entrusted. Office up-stairs in Smith Building. Phone 161. Jno. B. Hines. 24tf

Let us do your linen. We do 50 pieces of mangle work for 50 cents. Office second door south of Exchange hotel. Phone 141. Bryan Steam Laundry. 102

Buy a Singer Sewing Machine and get one that will do good work for a life time. The cost on repairs for inferior machines will speedily make the cheaper machine the more expensive of the two, regardless of the difference in service and satisfaction in favor of the Singer. T. A. Satterwhite, Agent, Bryan, Texas. 88tf

Bryan street, 50 by 115 feet.  
PRICE, \$5000.00

## HAWKINS UNDECIDED.

### No Decision Yet Rendered as to Anti-Gambling Act.

Austin, April 3.—Assistant Attorney  
General Hawkins Wednesday said that  
he had not reached a decision on the  
question as to whether the anti-gam-  
bling law goes into effect immediately  
or not. The attorney general's depart-  
ment has received many inquiries on  
this subject. It has developed that  
this bill, as originally passed in the  
house, did not carry the emergency  
clause and was passed by a viva voce  
vote, but that the conference committee  
added the emergency clause and this  
was adopted with the report by both  
branches by the necessary two-thirds  
vote.

The entire morning session of the  
senate Wednesday was devoted to the  
consideration of Robertson's (of Trav-  
is) bill requiring insurance companies  
doing business in Texas to deposit 75  
per cent of their reserve fund in the  
state treasury and invest in Texas se-  
curities, and when the senate recessed  
this measure was still under considera-  
tion, with a substitute for the bill.  
Considerable opposition has developed  
to this measure.

The charter of the Texas Cotton  
Warehouse Company of Houston, or-  
ganized at Dallas, was filed; capital  
stock, \$2,500,000. Dave H. Schapiro  
of Houston is at the head of the con-  
cern.

The court of criminal appeals has  
convened here for the April term. A  
number of cases were submitted Wed-  
nesday, but no opinions delivered.

A delegation of seventy-five, repre-  
senting various railway labor organi-  
zations in the state, reached here to  
protest against the bill to reduce pas-  
senger fare in Texas. They contend  
that it would result in greatly reduc-  
ing the force and giving inferior  
service.

An effort was made in the house  
Wednesday to take up the general ap-  
propriation bill, but there was abjec-  
tion and the effort failed. It is said  
that if the bill is taken up for consid-  
eration that it is the programme to  
pass it in the house without discussion  
and let the conference committee get  
to work on it at once. If this should  
be done it may pass during the regu-  
lar session and only tax measures be  
left for the extra session.

The house passed to third reading  
the senate joint resolution to amend  
the constitution to make more com-  
plete liquor regulations, and also to  
define the sale of liquor in local op-  
tion districts.

It passed finally Senator Smith's di-  
vorce bill and Senator Chambers' bill  
perfecting the C. O. D. liquor tax law.  
The house also passed finally Repre-  
sentative Ridgeway's bill increasing  
charter fees after amending it so as to  
create a position for an extra clerk  
in the state department to examine  
charters at a salary of \$2,000 per year.

The house committee on constitu-  
tional amendments reported favorably  
on the senate joint resolution to  
amend the constitution providing for  
an increase of the governor's salary  
to \$8,000 and fixing the salary of the  
Lieutenant governor at \$2,500. The re-  
solution had already passed the senate.

### ONLY ONE DEMOCRAT.

Sole Successful Candidate of That  
Party Named For Treasurer.

Chicago, April 3.—Revised unofficial  
returns of the election show what  
Busse, Republican candidate for may-  
or, has been elected by a plurality of  
13,016 over Dunne. The entire Repub-  
lican city ticket was elected with the  
exception of Edward C. Young, the  
candidate for city treasurer, who was  
beaten by John E. Treger, Democrat,  
by 7,953. The city council will be  
Democratic by the same number as the  
old council—thirty-six Democrats to  
thirty-four Republicans.

The traction ordinance recently  
passed by the city council over the  
veto of Mayor Dunne, and which pro-  
vides for immediate rehabilitation of  
the street car system, were carried by  
a vote of 165,646 to 132,720. As the  
matter now stands, the street car com-  
panies are compelled to pay the city  
55 per cent of their net income, al-  
lowing the city at all times access to  
their books.

### All Councilmen Democrats.

St. Louis, April 3.—Complete re-  
turns show the election of the entire  
Democratic council ticket and fifteen  
Democrats of the twenty-eight mem-  
bers of the house of delegates. Of the  
four members of the school board vot-  
ed for two are Democrats and two Re-  
publicans—re-elected.

### Oklahoma City Results.

Oklahoma City, April 3.—Late re-  
turns show the Democrats elected the  
mayor, city attorney, chief of police,  
police judge and three members of the  
city council. The Republicans elected  
the city clerk, city assessor and two  
members of the council.

### Republican Chosen Mayor.

Kansas City, Kan., April 3.—D. E.  
Cornell, Republican, a pioneer railroad  
man and civil engineer, was elected  
mayor over W. W. Rose, Democrat, by  
1,218 plurality.

### Dick Elected.

Ardmore, April 3.—R. W. Dick, Dem-  
ocrat, for mayor, and all the rest of  
his ticket was elected.

### Close Contest.

Arlington, Tex., April 3.—W. T. Pow-  
ell defeated John Compton for city  
marshal by two majority.

### Had Clear Orders.

Fort Worth, April 3.—At the cor-  
oner's inquest the conductors on both  
wrecked Katy trains in which eight  
men were killed testified that they had  
clear orders past the point of the  
wreck, thus placing the responsibility  
on the operator.

### Sail For Europe.

Bangkok, April 3.—King of Siam and  
party have sailed for Europe.

## HARRIMAN REPLIES.

Says That the President Has Done  
Him an Injustice.

New York, April 3.—E. H. Harriman  
late Tuesday night gave out a state-  
ment in response to one made public  
by President Roosevelt. Mr. Harri-  
man says that in certain things the  
president has done him an injustice.  
He says he was repeatedly urged by  
Mr. Roosevelt to visit the white house.  
One of the letters sent to him is as  
follows:

"In view of the trouble over the  
state ticket in New York, I should  
much like to have a few words with  
you. Do you think you can get down  
here within a few days and take either  
luncheon or dinner with me?"

In another letter the president says:  
"As a matter of fact, as you will re-  
member, when you did come down to  
see me you and I were both so en-  
gaged in the New York political situ-  
ation that we talked of little else."

"The president talks at length on  
the assertion that he did not ask me  
to contribute for the 'presidential cam-  
paign' nor for his 'personal benefit.' I  
do not deny this statement, nor is it  
at all inconsistent with the assertions  
I made in the Webster letter respect-  
ing the interview."

"The president sent me a request  
to go to Washington to confer upon the  
political conditions in New York state.  
I complied, and he told me he under-  
stood the campaign could not be suc-  
cessfully carried on without sufficient  
money, and asked me if I could help  
them in raising the necessary funds,  
as the national committee, under Chair-  
man Cortelyou had utterly failed of  
obtaining them, and there was a large  
amount due from them to the New  
York state committee."

"If that means anything whatever,  
it must be that he was urging me to  
help the New York state committee  
and not the national political presi-  
dential campaign, except so far as the  
success of the state ticket in New  
York would contribute to the national  
ticket."

"What the conditions of the finan-  
ces of the New York state committee  
and of the national Republican com-  
mittee at that time were, is well known  
to every one. That the national com-  
mittee did owe the state committee  
and that these are commensurate and  
that the state committee was in  
financial straits, is notorious. I was  
not a political manager. I was asked  
to go to Washington by the president  
in the interests of the state ticket.  
I could help raise money. That I did  
help in this regard, I did raise funds  
immediately upon my return from the  
interview with the president is unde-  
nied, and to this fund I contributed  
\$50,000. My interview with the presi-  
dent covered a wide range of sub-  
jects connected with the New York  
state campaign, and I did not pretend  
to go over the whole matter in the  
Webster letter."

"The president's letter of Oct. 14,  
and his comment thereon are interest-  
ing. In that letter he suggested that  
I might think there was some danger  
in my visiting him during the closing  
weeks of the campaign, and suggested  
that if I thought so, the visit be pos-  
tponed until after election, when he  
would ask me to discuss certain gov-  
ernment matters not connected with  
the campaign. Here were two distinct  
invitations to discuss two different  
subjects. I could see no danger in vis-  
iting him to discuss New York politics  
before the election, and therefore went  
and discussed the subject alone and  
after the election."

### GREAT FIRE LOSS.

City of San Francisco Was Enveloped  
In Darkness.

San Francisco, April 3.—The de-  
struction of the electric light and pow-  
er house of the San Francisco Gas and  
Electric Light company by fire plun-  
ged almost the entire city into darkness,  
resulting in the injuring of five fire-  
men, at least one of whom will die,  
and caused a loss estimated at \$2,  
500,000.

### Did Not Want Ambassadorship.

New York, April 3.—Senator Depew,  
when asked about the Harriman let-  
ter, said: "I know nothing about it  
except the part which refers to me as  
a possible ambassador to France. It  
is true that a friend told me that  
might be appointed to that place, but  
I told him I did not care at all for the  
ambassadorship. That is all I can  
say about the Harriman letter."

### Depot Plans Being Drawn.

Shawnee, Okla., April 3.—Plans are  
now being drawn for a \$100,000 pas-  
senger station to be erected in Shaw-  
nee by the Rock Island railroad. The  
structure will be located one block  
west of the present structure. A large  
freight depot is also being erected by  
the road at this point.

### Two More Bodies Found.

Fort Worth, April 3.—In removing  
the debris of the two freight trains of  
the Missouri, Kansas and Texas rail-  
way wreck two additional unidentified  
bodies were found by workmen. This  
makes the total dead as a result of  
the wreck eight.

### Todd Chosen Mayor.

Hot Springs, April 3.—M. H. Todd,  
candidate of the Democrats and Repub-  
licans for mayor, defeated Hamp Wil-  
liams, candidate of the Civic Improve-  
ment Union, by 100 majority.

### For Working on Sunday.

Crockett, Tex., April 3.—The city  
marshal arrested the entire force of  
the oil mill, some thirty in number.  
The indictment charged them with  
working on Sunday. All gave bond,  
and it is understood that their case  
will be strongly contested.

### Boys Burned to Death.

Tulsa, I. T., April 3.—Mrs. W. H.  
Campbell, while visiting Mrs. William  
Roeser in this city, received word  
from her home in Cleveland, Okla.,  
that her son Roy and Edgar Jones were  
burned to death in a barn fire.

## BLONDWOOD
